

The General Insurance Association of Japan

February 21, 2023

A total of 1.17 billion yen decided to be provided for CALI Investment Income Contribution Projects for FY 2023

~CALI Investment Income to be used for automobile accident prevention measures and victim assistance

At the Board Meeting on February 16, the General Insurance Association of Japan (GIAJ) decided to provide support totaling 1,708.88 million yen to 38 projects, including four new ones, by utilizing investment income from CALI (Compulsory Automobile Liability Insurance) premiums, which was contributed by general insurance companies.

Since 1971, the GIAJ has used this investment income to support various projects, including those for automobile accident prevention and support for victims of such accidents.

In FY2023, we will continue to focus on support for car accident victims and their families, while increasing efforts to prevent such accidents by reflecting recent changes in the traffic environment.

Regarding automobile accident prevention measures, in order to gather a wide range of information on various related initiatives and examine projects and research that are more in line with current social needs, an open application system has been introduced since FY 2019.
